

Robex Power Prep C

A powerful cleaner containing a combination of surfactants, inhibitors and water soluble solvents for the preparation of floors prior to coating.

Robex Power Prep C

- Penetrates oil and grease
- Loosens dirt and soil
- Water soluble
- Can be used on stainless steel and aluminium

Robex Power Prep C is a combination of surfactants, inhibitors, water soluble solvents and an inorganic acid designed to provide a product that will penetrate oil and grease rapidly to provide a clean surface prior to applying a Robex coating.

Application

Apply Power Prep C as supplied with a stiff broom and agitate to loosen deposits.

Power Prep C may be diluted with water before use depending on the degree of soiling.

After application the treated floor **MUST** be **THOROUGHLY** washed with plenty of fresh hot water to ensure **ALL TRACES** of the Power Prep C have been removed.

This process should be repeated before drying the floor and prior to applying any floor coating.

Failure to wash the floor thoroughly will result in any subsequent coating not curing properly.

Coverage

Coverage approximately 30m²

Health and Safety

Please refer to the relevant Health and Safety Data sheet.

In Person: Should you have any queries regarding product application, one of our trained sales engineers is always on hand to sort out any problems you may have.

On line: All of our technical data sheets and health & safety data sheets are available to download on line.

On site: If you would like Robex to apply your product for you call on the number below, we manufacture, we supply and we apply.
